EAP Grammar in Context

EAP Grammar in Context is a new pair-skilled, three-level series that helps college and university-bound students master the grammar that they will need to succeed in their future studies. There are three reading and writing books and another three listening and speaking books in the series.

The innovations of **EAP Grammar in Context** are the grammar that is taught and the way it is taught. The grammar used in EAP is different from the grammar used in everyday English. Pursuing the typically tense-heavy grammar syllabus of general English is not appropriate or effective in the EAP context. While tenses and verb phrases are taught in EAP Grammar, the predominance of the work is on syntax, with the basic syntactic patterns and the prominence of the noun phrase emphasized.

With the help of **EAP Grammar in Context**, EAP learners will learn to unpack complex phrases and gradually add more complexity to their writing.
